

Delivery and licensing options

Autonomous installation with a perpetual license or a hybrid subscription option. n7kel products and modules, what the license grants and what remains with the rights holder.

Version 1.0, October 11, 2026. This document is for information purposes only, describes a standard delivery and does not constitute an offer. The scope of work and terms are set out in the contract.

1. n7kel Vakhta delivery options

PARAMETER	AUTONOMOUS INSTALLATION	HYBRID OPTION
Hosting	n7kel on-site unit and server with dashboard, analytics and archive — on the client's hardware, in the client's network	On-site units at the sites; the server in a data center in the client's country
External connections	None; data does not leave the company	Only an outbound secure connection from the on-site units to the server
Vendor access to data	None; access to equipment only at the client's decision	Processing on the client's instructions under the contract; every access is logged
Right of use	Perpetual license: paid once, unlimited term	Subscription: monthly fee per camera and per checkout
Support and updates	Annual technical support and updates under contract	Included in the subscription
If support is not renewed	The installed version keeps working; new versions are not provided	The subscription ends under the terms of the contract
Suited to	Organizations that require everything in-house: banks, fuel networks, industry, healthcare	Networks that prefer a monthly fee and maintenance by the vendor

2. License scope

- the number of cameras connected to analysis;
- the number of checkouts in the Fuel Station Checkout module;

- the set of modules: post occupancy, PPE and hazardous zones, staff identification, Fuel Station Checkout, workplace actions, auxiliary condition assessment, wanted-list checks (only under the client's agreement with government authorities) and others;
- the hardware to which the license is bound;
- the term — under the contract, including perpetual.

Expansion — adding cameras, checkouts, sites or modules — is formalized by an amendment to the contract and a new license.

3. What the license does not transfer

3.1. A license, including a perpetual one, is a right of use, not a sale of the product. The source code and exclusive rights to the software, n7kel AI and documentation are not transferred and remain with the rights holder.

3.2. The license is signed and bound to the client's hardware — it does not work on another machine. n7kel AI is delivered encrypted and can be unlocked only by the license of a specific on-site unit; the on-site unit software is delivered compiled, without source code.

3.3. Transfer to other hardware (for example, when a server is replaced) is carried out in agreement with the rights holder, with a new license issued.

4. Terms of use

The contract prohibits:

- reverse engineering, decompilation and attempts to extract n7kel AI and its settings;
- circumventing, disabling or modifying licensing and protection mechanisms;
- transferring the software to hardware not covered by the contract;
- copying, distributing or transferring the platform or its parts to third parties;
- use for purposes not provided for by the contract and the client's internal policy.

The contract also defines the procedure for access to equipment, the storage of key fingerprints for independent evidence verification and the destruction of the storage device upon termination of the contract.

5. What the price consists of

The price is set out in a commercial proposal following the site survey, which also states its validity period. The client may use its own server hardware that meets the

requirements.

ITEM	PRICE
Site survey and commissioning	Determined after the site survey
Equipment per site: on-site unit and server	Determined after the site survey
License — per camera	Determined after the site survey
Fuel Station Checkout module license — per checkout	Determined after the site survey
Annual technical support and updates	Determined after the site survey
POS system or 1C adapter	Determined after the site survey
Further training of n7kel AI for the client's tasks	Determined after the site survey
Integration with client systems	Determined after the site survey
n7kel Voice	Depends on the number of languages and channels; determined after the site survey
24/7 support	Included in annual support or the subscription; response times under the contract
Pilot: 2–4 weeks, 1–2 sites	Determined after the site survey

6. n7kel products

6.1. All n7kel products are supplied on the same terms: the right of use on the client's equipment, an autonomous or hybrid option, annual support or a subscription. The main license scope parameters:

PRODUCT	MAIN SCOPE PARAMETERS
n7kel Vakhta	Cameras, checkouts in the Fuel Station Checkout module, set of modules
n7kel Fuel Station Control	Stations and tills in the network, set of modules
n7kel Antifraud	Stores, checkouts and cameras
n7kel Voice	Number of languages and audio channels; the price depends on the number of languages
n7kel Flow	Sites and cameras; the individual analytics module is separate
n7kel Access	Access points, equipment; the patient face check-in module is separate

PRODUCT	MAIN SCOPE PARAMETERS
n7kel Atlas	Connected sources, users and data volume

6.2. The hosting option, license scope and support terms for each product are determined after the site survey.

7. Delivery documents

- the license agreement and its annexes, including key fingerprints for independent verification of evidence;
- technical support and update terms;
- a non-disclosure agreement;
- a data processing agreement — in the hybrid option;
- for wanted-list checks — the client's agreement with the authorized government bodies;
- the on-site acceptance certificate;
- the user guide and operating documentation.
